

**High temperature cables (also known as High Temp cables) represent a vast range of cables which continue to perform at increased and elevated temperatures.**

**In addition to the cables forming part of our standard high temperature cable range, we can supply a number of other high temp cables manufactured to international standards or custom designed to meet your application's specific requirements.**

**Depending on requirement and area of application, we will develop and produce high temperature resistant special cables for you that are designed for safe operation at temperatures of up to 1,250 °C. Tailored to your application, we will select the materials that in the best possible way match the property profile required by your specified temperature range. These include silicone, fluoropolymers, glass fiber and ceramic-based insulation materials.**

## **Application :**

- electric heaters

- extruders and dryers
- glass
- ceramic production
- steel
- metallurgy plant
